DSLL (integrated) location-based services workshop

Welcome, DSLL news and workshop introduction

17 December 2011, +Tova, Sofia

Dr Stavri Nikolov

Digital Spaces Living Lab Director

stavri.nikolov@attentivedisplays.com

Workshop Agenda

10:30 – 10:50	**Welcome, DSLL news and workshop introduction** Stavri Nikolov (DSLL Founding Director and Workshop Chair)
10:50 – 11:10	**Clusttour (www.clusttour.gr)** Yiannis Kompatsiaris (Senior Scientist) and Symeon Papadopoulos (Project Leader), ITI, Greece
11:10 – 11:30	**StockPodium (www.stockpodium.com)** Georgi Kadrev (Managing Director), Imagga, UK and Bulgaria
11:30 – 11:50	**Broadcastr (beta.broadcastr.com)** Stanimira Jelezova and Marina Tsvetinova, Astea Solutions, Bulgaria
11:50 – 12:10	**Favit (www.favit.com)** Konstantin Christoff (Managing Director), Favit Networks, Bulgaria
12:10 – 12:30	**Integrated DSLL LBS prototype** Stavri Nikolov and Georgi Kadrev
12:30 – 13:00	**Discussion of integrated DSLL LBS prototype and the way forward** All
13:00 – 13:30	**DSLL Christmas meeting (drinks and nibbles)**

DSLL Main Objectives (1)

- to help IT, media and communications companies to test new technologies and products in very early stages of their development and with real users
- to support new ideas and start-up companies in the digital media sector via the DSLL Technology Incubator
- to give start-up companies in the digital media sector access to unique, specialised and cutting-edge infrastructure and facilities which will help them develop quicker and better their products and services

DSLL Main Objectives (2)

- to foster co-creation and co-development of new technologies and products that combine and fuse core technologies developed by industrial and academic partners
- to create a real-life and online community of specialists and non-specialists who are interested in digital media technologies and a venue and forum where they can meet and discuss ideas.
- to support and take part in the creation of a global network of Living Labs

II LL Summer School 2011 (Citilab, Barcelona)

ENoLL is changing…

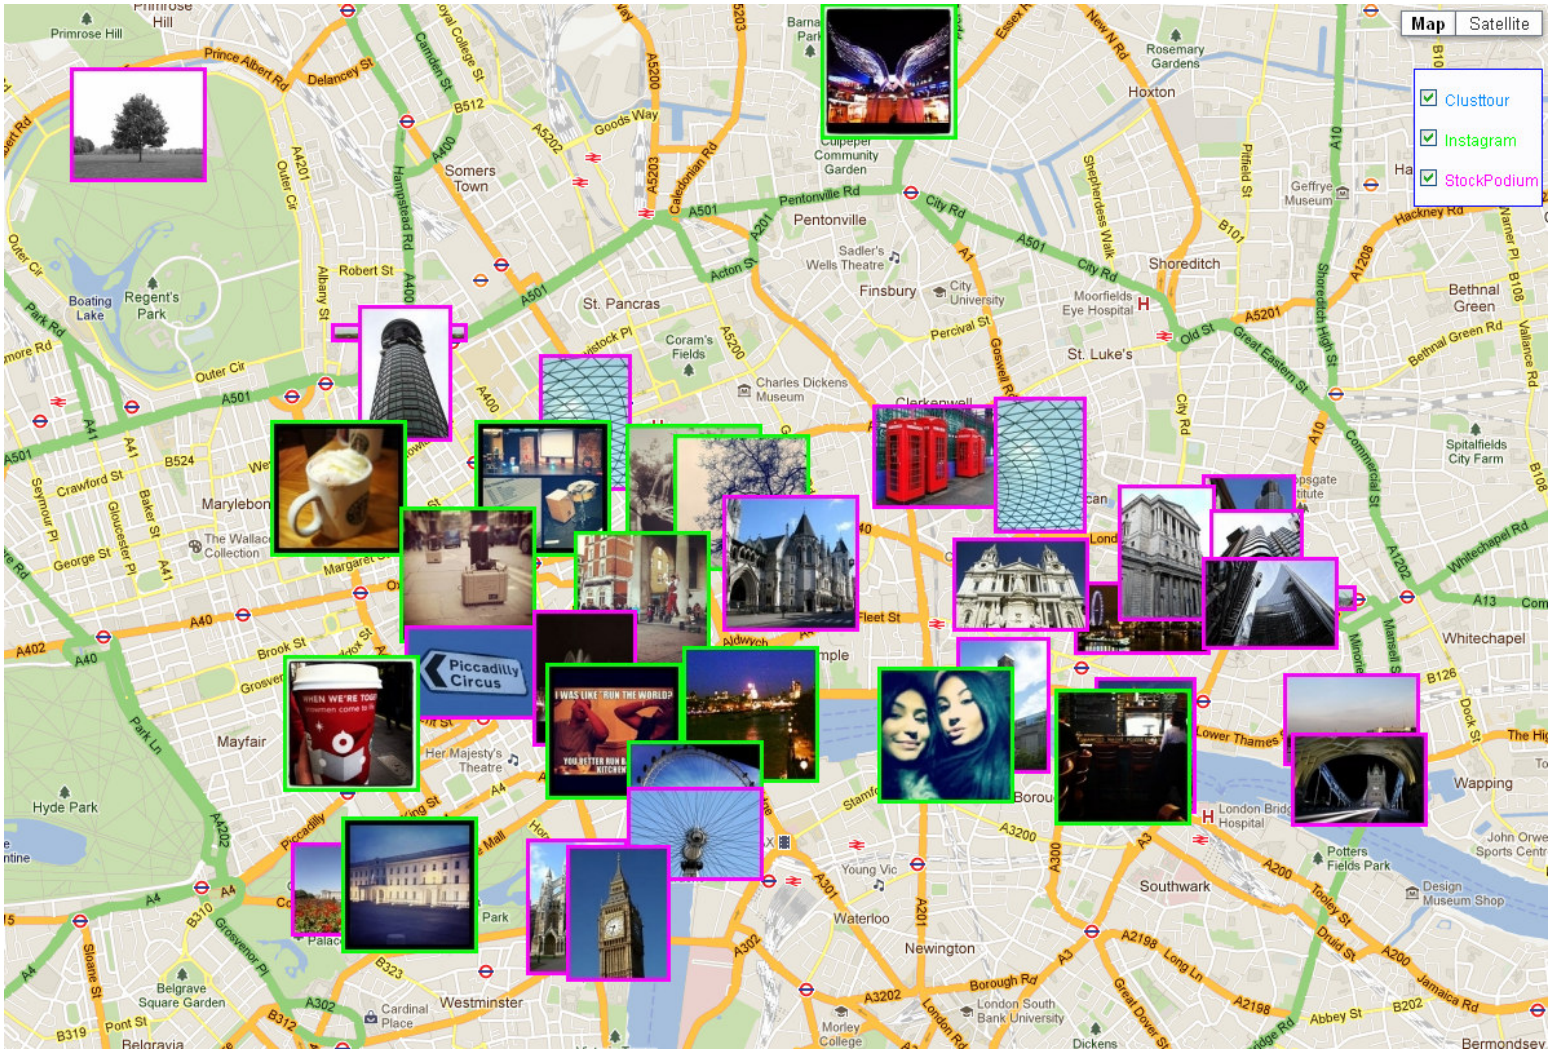
- From a group of LLs into a very large group of LLs (200+)
- From a very large group of LLs into a real network of LLs
- From a European network of LLs to a global network of LLs (Brazil, Africa, Taiwan,..)
- From a network focused on research to one focused on innovation
- ….and in doing so there are many interesting things happening and lots of new opportunities

Ongoing DSLL Projects

COIN Integrated Project: Collaboration and Interoperability for Networked Enterprises
The mission of the Coin IP is to study, design, develop and prototype an open, self-adaptive, generic ICT integrated solution to support the Europe 2020 vision, starting from notable existing research results in the field of Enterprise Interoperability and Enterprise Collaboration. DSLL is a COIN multiplier partner and a full partner in the COIN EEU sub-project via Favit Networks.

Apollon: Advanced Pilots of Living Labs Operating in Networks
One of the main strengths of the Living Lab approach is its ability to merge research and innovation processes with the local, real-life context. Over the past years, an increasing number of Living Labs have started operations throughout Europe, and are forming a vibrant and growing community. It is clear that networking and federation at a European scale is needed in order to fully leverage the strength of these locally embedded labs. Current initiatives focus e.g. on the exchange of general principles and best practices for individual Living Labs. The **Apollon project** will take the next step in networking and harmonising Living Lab approaches throughout Europe. DSLL is a support partner of Apollon.

DSLL (Integrated) LBS



DSLL Plans for 2012 (1)

- Take part in various ENoLL activities and projects
- Join and contribute to the ENOLL new PPP proposal to the EC
- Take part in the IIIrd ENoLL meeting in Finland in August 2012 and present DSLL (members) there
- Participate in smart cities projects like Peripheria
- Develop further the integrated DSLL LBS prototype and use it as a LL/ENoLL activity visualisation platform and in several other projects
- Develop the integrated DSLL LBS prototype into a commercial service

DSLL Plans for 2012 (2)

- Create other integrated services and pilots between DSLL members and other LLs in ENoLL
- Create DSLL Kids Lab – a new part of DSLL especially for kids focused on interactive education and games
- As one of the main activities of Kids Lab try to create in Sofia an interactive space for education and game play where kids can play with and experience various state-of-the-art interactive and media technologies
- Further develop DSLL Tech Incubator
- Create a separate entity to manage DSLL
