

Ontotext AD is a leading developer of core semantic technology. It has 35 full-time employees, multiple affiliates and contractors in Western Europe. Since November 2008 Ontotext is a founding member of the Digital Spaces Living Lab, Sofia, Bulgaria, which is a member of the European Network of Living Labs (ENoLL).

Research and development expertise: Ontotext is part of many outstanding EU research projects such as On-To-Knowledge, SWWS, DIP, SEKT, SUPER, LarkC, etc. which have influenced significantly the present state of the Semantic Web. Currently Ontotext participates in four ongoing projects. It is partnering with more than 80 organizations within these research projects. Ontotext (as part of Sirma Group) has been awarded the most successful Bulgarian company in FP6.

Industrial expertise:

Ontotext has unique coverage of technology areas, including:

- **Semantic Databases:** high-performance scalable RDF DBMS
- **Semantic Search:** text mining (IE), Information Retrieval (IR)
- **Semantic Web Services and BPM:** WS annotation & discovery
- **Web mining:** focused crawling, wrapping
- **Knowledge fusion:** identity resolution, record linkage.

Products: Some major products developed by Ontotext include:

- **KIM** – a semantic annotation and search platform. It is being used in projects with total budget above 45 million euro and as a platform for enterprise KM in various domains: news, clinical study analysis, intellectual property mining, multimedia libraries and education portals.
- **OWLIM** – a semantic high-performance RDF database suitable for analytical tasks and integration of heterogeneous data.
- **LifeSKIM** – a life science knowledge management platform, based on semantic technology and optimized to increase the accessibility of life science data.
- **WSMO Studio and wsmo4j** – are open-source products in semantic web services and Semantic Business Process Modelling environment area co-developed by Ontotext.

Innovation: Ontotext develops outstanding innovative products and is deeply involved in few of the most popular open-source projects in the area – GATE, Sesame, wsmo4j and WSMO Studio.

Major clients and projects: We have established excellent working relations with a wide network of research centres and industrial partners. Some of our industrial customers are: MERCK KGaA (Germany), AstraZeneca (Sweden), Imindi Inc (USA).

Additional info: Ontotext is involved in two joint ventures:

- Innovantage: online recruitment intelligence provider in UK;
- Namerimi: national search engine in Bulgaria.
