GNSS LIVING
LAB PRIZE

GNSS Living Lab Prize

The GNSS Living Lab Prize calls for developers and users to submit proposals for GNSS-related products and services that are ready to be tested and ideally implemented in a suitable Living Lab. A prototype of the solution is necessary to be demonstrated in front of a panel of experts. Furthermore, the product or service needs to benefit from user validation in a Living Lab.

The Partners

The Digital Spaces Living Lab (DSLL), Bulgaria supports industrial and academic partners working in the field of new digital media technologies and location-based services (LBS). DSLL provides a creative environment for research and innovation, as well as new forms of direct user involvement in the innovation process. Together with the IUL LUTIN, a Living Lab based on a “userlab” platform for usability observations and experiments, where new products and services are being co-innovated by researchers, companies, and individuals they support the development of GNSS related products and services.
